

PRASHANT

Product Designer | UI/UX

Delhi, India • +91-8287519160 • prashant.designux@gmail.com • [Linkedin](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Product Designer who works comfortably at the intersection of **product and brand**, designing intuitive **B2B and B2C** web and mobile experiences while keeping visual language structured, intentional, and consistent. Strong foundation in **typography, hierarchy, colour, and layout**, paired with **UX research, design systems**, and prototyping skills. Proactively brings **AI-assisted tools** into the workflow to move faster from research to production-ready screens, and takes **ownership** of work beyond the brief refining content, tightening process, and contributing ideas on planning, not just execution.

SKILLS

Design Tools: Figma, Framer, Sketch, Miro, FigJam, Figma Make, Zeplin, Google Stitch, Notion.

Design Fundamentals: Typography, Colour Theory, Visual Hierarchy, Grid & Layout, Composition, WCAG Accessibility Standards.

Design Systems: Design Tokens, Primitive and Semantic Tokens (Figma Variables), Components & Variants, Styles & Libraries, Auto Layout, Developer Handoff.

UX Research & Strategy: User Research, Competitive Analysis, Qualitative and Quantitative research, Information Architecture, User Personas, User Flows, User Stories, Journey Mapping, Sitemap Creation, UX Audit, Surveys, Benchmarking, Heat Maps, Design Thinking.

Design Process: Sketching, Wireframing, UX writing, High-Fidelity UI Screens, Prototyping, Interaction design, Rapid Prototyping.

Motion Design: Micro-interactions, Figma Motion, Adobe After Effects (Learning).

AI-Driven Design: Gemini, Uizard, Visily AI, Figma MCP, ChatGPT, Claude MCP, AI Prototyping, AI-assisted Design Workflows used for accelerating asset production, layout variations, and content drafting.

Production Capability: Comfortable producing marketing assets in Canva, social ads, digital ads, and presentation decks.

Frontend Knowledge: HTML, CSS, JavaScript, React, Tailwind CSS.

Soft Skills: Ownership, Active Feedback-Taking, Cross-functional Communication, Collaboration, Remote & Cross-Time-Zone Collaboration, File Organization & Version Control.

WORK EXPERIENCE

UI/UX Designer (Freelance Contract) — *(Whuups)* | Remote | Lewes Delaware, USA

Sept 2025 – Nov 2025

- **Collaborated** with a Senior Designer to create and refine **Home and Profile UI** for the Whuups **mobile app**, iterating based on design **feedback** and usability considerations. **(NDA Protected)**
- Worked with the Team and Delivered **20+ high-fidelity B2B SaaS CRM and ERP screens**, applying UX research and workflow analysis to **reduce lead management task steps by 40%**.
- Created wireframes and **Worked on design system** that improved design consistency across the **Whuups website**, contributing to the launch of key production-ready pages. **Visit:** whuups.com.
- **Crafted 20+ wireframes** and responsive high-fidelity landing pages for IntusLab, establishing a consistent visual language across **AI, AR/VR, Blockchain**, and software service offerings. **Visit:** intuslab.io.
- Adapted and **resized 20+ layouts** across multiple pages and screen formats while working within established **brand and design** guidelines, managing revisions against deadlines with minimal rework.
- Produced or adapted Social, Ad, presentation decks or promotional graphics for Whuups/IntusLab.

UI/UX Intern — *(Mixins Technology)* | Remote | Pune, India

Jul 2025 – Sep 2025

- Have Created wireframes and responsive website with **2 tailored onboarding journeys (shopkeeper and customer)**, reducing unnecessary user steps and creating a more intuitive first-time experience.
- Designed key **product discovery and checkout flows** for Basketo, including product listings, search, filters, product selection, and cart interactions to create a smoother shopping experience.
- Collaborated with the team on design for **Basketo**, a local commerce platform **serving 2 user groups**, redesigning key user flows to **improve navigation efficiency** and task completion. **Visit:** basketo.in.

UI/UX Intern — *(Vislona)* | Remote | Tamil Nadu, India

May 2025 – July 2025

- Conducted UX research for **Machine Maintenance**, a **B2B SaaS** software focused on helping businesses monitor and manage industrial equipment and maintenance operations.

- Mapped **end-to-end user journeys and workflows** and developed user personas to **understand** the needs, **pain points**, and **behaviors** of maintenance teams.
- Researched **AI-powered predictive maintenance features**, exploring how **IoT sensor data** could help identify potential equipment issues and enable maintenance teams to take proactive action.

KEY PROJECTS

Recore Mail • B2B SaaS — ([Read Case Study](#))

Figma • Miro • Notion • Claude • Figjam • Prototyping

- Designed a B2B SaaS platform that **simplifies large-scale email campaigns** by making campaign creation, delivery monitoring, and failure recovery intuitive for marketing teams.
- Unified **Email Marketing, Invoicing, and Inventory Management** into a single, scalable B2B SaaS platform.
- Designed a visual **Dead Letter Queue (DLQ)** dashboard to make email delivery failures easier to monitor and **improve the delivery rate by 95%**, in Campaign Builder flow **Dropoff reduced by the 62%**.
- Maintained a consistent **visual and brand language** across all three modules (Email, Invoicing, Inventory) and their component library, reinforcing trust and clarity for technical B2B buyers.

Big11 India • Mobile App — ([Read Case Study](#))

Figma • Miro • Notion • Claude • Figjam • Prototyping

- **Redesigned** three core journeys **match discovery, KYC verification, and wallet management** for a fantasy-sports app, focusing on clarity and trust in a real-money product.
- Simplified and Merged **UPI, PAN, and Bank** Documents into a **single scrollable KYC form**, cutting a confusing multi-step process down to one clear flow.
- **Shipped** a complete, production-ready design system and **high-fidelity screens** (Login, OTP, Home, Wallet, Add Cash, KYC) development paused following a government ban on real-money fantasy-sports apps, not due to design scope.

Design System & Tokens Architecture — ([Read Case Study](#))

Figma + Claude/MCP

- Used **Claude + Figma MCP** to accelerate **tokens** organization and documentation workflows, while validating all variable relationships directly in Figma.
- **Token types:** Color · Spacing · Sizing · Radius · Typography · Spacing Jumpers · Breakpoints (Desktop / Tablet / Phone).
- Built a scalable design token architecture (**Foundation → Alias → Mapped → Responsive**) spanning **379 variables across 7 collections** in Figma, supporting light/dark themes and desktop/tablet/phone breakpoints.
- Structured **semantic token** layers (Surface/action, Text/error) so components reference intent rather than raw hex values, reducing visual drift and easing cross-theme maintenance.

EDUCATION

B.A. (Honours), Economics — Rajdhani College, University of Delhi — Graduated: 2026

Senior Secondary (Humanities) — CBSE Board — Completed: 2021
